Accountants create, disseminate, and evaluate financial information. This program will give you an introduction to various information technologies, expose you to conceptual issues, and provide you with the appropriate technical skills to become an entry-level accountant. You'll complete formal presentations, live projects, group projects and various case studies during the course of your degree.

In the accounting program, you will work closely with friends and classmates to complete projects that simulate real-world accounting problems. The teaching staff are not only educators but industry professionals and executives who are able to bring their experience into the classroom.

Patrick Q., BComm’14

Lisa C.
BComm’06, CA, CPA
After working as a chartered accountant for EY in London, England - Lisa used her business experience and passion for sustainability to bring Neal's Yard Remedies, a UK-based manufacturer and retailer of natural and organic health and beauty products, to Canada.

In the accounting program, you will work closely with friends and classmates to complete projects that simulate real-world accounting problems. The teaching staff are not only educators but industry professionals and executives who are able to bring their experience into the classroom.
