Haskayne School of Business

OPERATIONS MANAGEMENT

Bachelor of Commerce (BComm)

Operations Management looks at optimizing efficiency in the activities directly related to making a product or providing a service. This program will introduce you to operations management concepts such as forecasting, planning, capacity and project management. You’ll also be introduced to software and analytical aids for managerial decision-making, complete formal presentations, participate in group projects and engage in case studies during the course of your degree.

Did You Know?

Our co-operative education (co-op) program will give you 12 to 16 months of paid full-time work experience before graduating in your chosen field. More than 85% of co-op students are employed within three months of graduation.

Awards

ENACTUS CALGARY

Naheed Nenshi
BComm’93

Nenshi has been the Mayor of Calgary since 2013. He is the first Canadian winner of the World Mayor Prize by the City Mayors Foundation, which he won in 2015.

Many operations management courses feature interactive case simulations to demonstrate how textbook concepts play out in real businesses. I found the project management course particularly interesting for this reason. We were charged with managing every aspect of a simulated construction project over the entire semester.

Lyndsey R., BComm’15
