Faculty of Nursing

NURSING

Bachelor of Nursing (BN)

Leading the way on health-care teams, registered nurses are in high demand for their clinical skills and theoretical knowledge. Over the course of your studies, you’ll be involved in active learning within the classroom, with small clinical groups in a variety of off-campus nursing practice settings, and in simulated clinical laboratories.

Did You Know?
Our nursing faculty proudly houses a clinical simulation learning centre (CSLC) that allows students to practice their skills and provides a bridge between theory and practice in a no-risk environment.

Nancy Moules
BN’95, MN’97, PhD’00
A three-time University of Calgary graduate, Professor Moules is a nursing professor who holds the Kids Cancer Care Foundation Chair in Child and Family Cancer Care. Moules has received a number of teaching excellence awards, and was admitted to the Order of the University of Calgary in 2013 for her exemplary and distinguished service to the university.

- Open option

I wanted what anyone wants in a career: respect, authority and money. What I didn’t realize is that I can get it all in nursing and be ready to go after four years of university. Nursing requires critical thinking, hard work and stamina. You can’t be successful as a nursing student unless you are 100% committed, but it’s a wonderful choice.

Mackenzie M., Nursing student
