**John Gilchrist**

**BA’77 (Psychology and Drama)**

Restaurant critic for the Calgary Herald and CBC Radio, best-selling author, and UCalgary continuing education instructor.

**“**

Geography offers hands-on opportunities, field courses and small classes. A standout experience for me was doing NSERC (Natural Sciences and Engineering Research Council of Canada) research with professors. The quality of instruction and experience is very high - this is a great program to thrive in.

Taylor M., geography student

**Faculty of Arts**

**GEOGRAPHY**

**Bachelor of Arts (BA), Bachelor of Science (BSc)**

Geography is an integrative discipline that explores the earth as a whole system. Geographers focus on places and spaces to understand the interrelated elements associated with environmental, economic, political, and cultural change, and to propose solutions to problems in these areas. During the course of your studies, you will develop skills in research, geospatial methods, logical and abstract reasoning, as well as in-depth knowledge of the different regions and cultures that make up our global community.
