Faculty of Arts

SOCIOLOGY

Bachelor of Arts (BA)

Sociologists study how social structures, social processes, and cultural products constrain and enable human behaviour. Societies are products of the actions and interactions of individuals, and sociologists use empirical research to explore every level of social life. During the course of your studies, you’ll gain statistical analysis skills, research capabilities, written and verbal communication skills, and a deeper understanding of the complex nature of society.

REGINALD BIBBY

O.C., MA (Sociology)

I am so glad I found this program. I transferred into sociology without knowing exactly what it was all about, but interested in criminology and social control. Sociology exposes you to so many new and diverse viewpoints and really forces you to re-evaluate the way you see the world.

Johanna V., sociology student
